"I was taken sick nine years ago with fever."

writes Mr. M. M. Wardwell of Linwcood, Leavenworth Co., Kansas. "Had the doctor and he
broke up the fever all right, but I took diarrhors right away; he couldn't cure it and it
became chronic, and then he gave up the case.

I got so weak with it and had piles so badly a
couldn't lie down, nor hardly sit up. Was
that way two or three months; thought I would
never be well again, but picked up one of Dr.
Pierce's Memoc'andum Books one day and saw
your description of catarrh of the stomach. I
thought in hit my case. We had a bottle of Dr.
Pierce's Golden Medical Discovery in the house
that was got for mother. You recommend it for
catarrh of the stomach, so I went to taking it.
The one bottle nearly cured me. I got two hotties next time and took one and one-half and
was well. I haven't been bothered with diarfine a since."

PASTORAL LETTER.

The following is a synopsis of the triennial pastoral read in the Episcopal convention which adjourned at San Francisco on Thursday.

The letter which is very long, begins as follows: "In compliance with your request, dear brothren of the clergy and of the laity, and in accordance with our time-honored custom, your bishops are come to speak parting words of ex-nortation and of blessing. The session of the great synod is ended. We have taken council together of the things concerning the Kingdom of God; we a ve made more nearly perfect, as we trust, the organization for the accomplenment of its works; we have chosen new leaders of the milient bost; we have devised, as we believe, larger en-terprise of future advance. Surely we usvegalised new courage by clasping the bands of brothers beloved, and we go forth boldly into the night, the night of trial and of battle, looking for and Catarrh, waiting for the dawn of victory and esct.

The letter then reviews the mission-ary work of the church, and cont nues: "Perhaps we may describe the chief indrance in the way of the kingdom's dvancement in our time, as, indeed, it istory, as the z rights, the spirit of be are, the very atmosphere in which we much have our life. Because that epirit changes; because that enfolding amosphere is different now from any tost before did encompass Christian warriors, the efore it is that the new dangers are apparent and new methods

of we fare must be employed.

"Bas we must bid you note and a rive against the last and most evil resuit of our age-tendency in the reckcaricature and contradiction of that deal of personal liberty which the ideal of personal liberty which the church has created and prepetuated among men. The fool who saith in his heart there is no God is quick of go forward to the natural corollary that there is no human uthority of right demanding his recognition and obedience. The man who terides the revealed foundation of all thirst obtains in the case victim of

to whom in superstitions saith obedience has been rendered, and anarchy is here as the legitimate offspring of unbelief.

"The crime at Buffalo a month ago, taken away, was but the natural fruit of this tree of God-defying denial. The great and good President was slain oy the spirit of our age. We must recognize that this awid crime, thrice repeated within forty ears, is the offspring of the spirit of law ieseness, full grown to maturity, and of malevolonce, and that other children of this same evil spirit are close about us on either hand, themselves the strength of the family of lawiessness, who make possible and certain these giant mon-sters whose deeds of violence have snocked our souls. The failure of the cuiz-a of a republican government to do his duty in the endeavor to elect nonest and true men to the offices of

that government is the earliest political manifestation of this pernicious life. "The citizen who first selfishly re-fuses his civic duty, and then in natural descent along the easy path be-comes the giver of bribes and the corrupter of his fellows is himself degraded more in the process, and the bottom is found when civic ights and civic righteousness are alike torgo ten, when the duty to his neighpor demands performance, when pro-tection to weakness, the equality of freemen, the conservation of honesty are no longer the ends of the govern-ment, but only the securing of peculiar privileges for a class, the comfortable du y to man is forgotten because duty to God is denied."

The people are called upon to guard the sanctity of their tomes, and the growing di-regard of the observance of quoav is deploted.

Lisity, the letter urges the members to carry away from the great synod to come—missions, missions, missions."

The close of the pastoral is a benediction on the workers in the Christian

A SEVEN-MASTED CHOONER -In an earlier day to the ceasting trade the wo-mested schooner was the common type; then came the three-masted schooner, and this was followed by vessels of tour, five, six, and now seven masts. To five-masted schooner con-structed to 1899 will carry 4,000 tons of coal. A six-massed schooner, on her maximum draught of twenty-four feet, will carry 5,500 tons of cargo. The latest of these gian schooners is the great seven-maxted vessel built from designs by B. B. Crowninshield, of Bosistest of these gran schooners is the great seven-maxed vessel built from designs by B. B. Crowninsheld, of Boston. Unlike her predecessors, the new schooner is to be constructed throughout of steel. The total sail area of the

lower sails and topsails will be 40,617

lower sails and topsalls will be 40,617 square feet. All of the standing rigating, and in special cases the running righting for the lower sails, will be of wire rope. Although this vessel is to be propelled entirely by sails she will carry a considerable installment of machinery for the purpose of hoisting anchors and sails, so that the total number required to work her is only nineteen men. The total cost of the vessel will be about \$250,000.

A NEW WIRELESS METHOD -A dispatch from London says Messis, Arms.rong and Orling yesterday gave a demonstration of their method of transmitting electrical energy without wires. The weather was boisterous, but the demonstration was satisfactory. Two sheds, 500 yards spart contained respectively the pa'ent apparatus and an ordinary telephone receiver. Conversations were carried on and messages sations were carried on and messages in the Morse telegraphic characters were transmitted. The inventors claim that the same results obtained by the Marconi system can be obtained by earth currents instead of ether waves, and that their system is less costly than Marconi's. The toventors also showed a loud speaking apparatus suitable for use between ship and shore. They claim that this apparatus can be installed on any ship, at a cost of a few pounds. Interference by competing currents is excluded, and the appara us is so simple and certain of eperation that a child can control it.

It Happened in a Drug Store.

"One day last winter a lady came to my drug store and asked for a brand of cough medicine that I did not have in stock," says Mr. C. R. Grande, the popular druggist o Onario, N. Y. "She was dis-ppointed and wanted to know what cough preparation I could recommend. I said to her that I could freely recommend Chamberlain's Cough Remedy and the she could take a bott e of the remedy and after giving it a fair trial if she did not find it worth the money to bring back the bottle and I would retund the price paid. In a course of a day or two the lady came back in company with a friend in seed of a cough medicine and advised her to huy a bottle of Chamberlain's Cough Remedy. I considered that a very good recommendation for the remedy." The remedy owes its great popularity and extensive sale in a large measure to the personal recommendations of people who have been cured by its use. It is for sale by Richard Gibson.
